*课程简介 (Description)	<p>Scientific research ability is a reflection of the characteristics of integrating science and education in education and establishing a research-oriented teaching model. We respect laws, benchmark first-class, and establish a research-oriented teaching and education model with business characteristics. At the same time, it is necessary to cultivate the enthusiasm and initiative of teachers and students to attach importance to scientific research and learn how to do so from the source, establish a solid research foundation, and do a good job in basic work. We actively carry out innovation in the integration of science and education in running schools, taking the lead and setting up academic cutting-edge lecture courses. This course adheres to the guidance of Marxism, follows the correct political direction and academic orientation, and accelerates the construction of the discipline system, academic system, and discourse system of philosophy and social sciences with Chinese characteristics. Focusing on strengthening students' ideals and beliefs, with the main line of loving the Party, patriotism, socialism, the people, and the collective, and focusing on political identity, patriotism, cultural literacy, constitutional and legal awareness, and moral cultivation, we will optimize the ideological and political content of the course. According to the spirit of relevant national documents and the school's talent training objectives, and following the law of talent growth, this course deepens undergraduate students' understanding of the human civilization tradition and the historical mission of the great rejuvenation of the Chinese nation, deepens academic understanding of the frontier field of economic management, and aims to improve scientific literacy, humanistic spirit and interdisciplinary vision, and promote the comprehensive development of students' morality, intelligence, physique, beauty and labor.</p>
